### **Greenpoint Technologies Inducts 747-8 for Aeroloft™ Installation**

Kirkland, WA – February 29, 2012 – [Greenpoint Technologies](#), a premier VIP completions center for [Boeing Business Jets](#), inducts the first 747-8 VIP aircraft for the [Aeroloft™](#) installation.

The Aeroloft™ is a modular product designed specifically for the Boeing VIP 747-8 aircraft, providing eight private sleeping berths located above the main deck in the aft section of the aircraft. “The Aeroloft™ provides a VIP sanctuary for individual passengers to escape the noise and activity of the main deck for rest during travel,” affirms Scott Goodey Greenpoint President and CEO. This is the first of three installations delivering in 2012.

Greenpoint Technologies is a premier Completion Center for [Boeing Business Jets](#) established in 1988. Greenpoint provides turnkey VIP aircraft interiors for private individuals and heads-of-state clients. In-house talent includes interior design, engineering, program management, manufacturing and certification for interior installations and modifications. Strategic goals focus on the customer experience by incorporating quality, commitment and craftsmanship into every completion.
