

## **PRESS RELEASE**

### **GREENPOINT TECHNOLOGIES IS EXHIBITING AT EBACE IN GENEVA, MAY 4<sup>TH</sup>, 5<sup>TH</sup> AND 6<sup>TH</sup>**

April 26, 2010

Kirkland, WA

Greenpoint is developing concepts for a patent-pending, ground-to-main deck lift (elevator) for the 747-8 VIP aircraft, called "Aerolift." The lift is capable of transporting passengers from the ground to the main deck, providing an elegant and secure method to board and exit the aircraft. A full-size mockup of the Aerolift will be displayed at Greenpoint's booth (#455) at the European Business Aviation Convention and Exhibition (EBACE) in Geneva Switzerland, May 4<sup>th</sup>, 5<sup>th</sup> and 6<sup>th</sup>.

Greenpoint also provides the 747-8 "Aeroloft™," which may be installed simultaneously with the Aerolift, prior to aircraft input to the completion center. The Aeroloft™ consists of sleeping berths and lounge modules located above the main deck in the aft section of the aircraft between doors four and five. The Aeroloft™ includes custom designed interior furnishings with a staircase. "This program has turned out to be a very popular option amongst the 747-8 VIP customers," states Sloan Benson, Greenpoint's Executive Vice President.

In addition to the full-size Aerolift mockup, a cut-away 1/40<sup>th</sup> scale Boeing 747-8 model with the Aerolift and Aeroloft™ will also be on display.
