Greenpoint Technologies Delivers 4th Aeroloft®

Kirkland, WA – July 15, 2013 – [Greenpoint Technologies](http://www.greenpointtechnologies.com), a premier VIP completions center for [Boeing Business Jets \(BBJ\)](http://www.boeing.com), delivers its 4th Aeroloft® to a confidential customer.

The 747-8 Aeroloft® offers flexible installation options. The product’s design and manufacturing process supports third-party installations. Greenpoint’s team installed the first three deliveries; this is the first Aeroloft® the customer plans to install at their own facility. The Aeroloft® is a modular product providing eight private sleeping berths located above the main deck in the aft section of the 747-8. Greenpoint continues to support the customer during the installation and certification phase to finalize its completion.

“Our core business is designing and manufacturing unique interior solutions. The Aeroloft® program is a great example of a new product on a new aircraft. We anticipate the same success for our 747-8 and 787 products currently in development,” affirms Greenpoint President and CEO Scott Goodey.

The company is speaking to future 747-8 Aeroloft® customers who are also interested in Greenpoint’s Aerolift™. The Aerolift™ is an elevator that permits ground to main deck access for up to four passengers or a wheel chaired passenger with an attendant.
