

PRESS RELEASE

GREENPOINT TECHNOLOGIES EXHIBITS AT NBAA, BOOTH #948

September 19, 2008

Kirkland, WA

Greenpoint Technologies, Inc. (GTI) will be exhibiting at booth #948 at this year's NBAA.

GTI is delivering an aircraft this October, and inducting a BBJ first quarter 2009. Both programs are scheduled to deliver on-time. GTI has also contracted additional VIP BBJs for future delivery into 2012.

"The geographical location of our clients has changed adding Russia and India to an already strong client-base," states Sloan Benson, Executive Vice President.

In addition to recent deliveries, GTI has received a contract to design, engineer, and manufacture an extensive modification kit for an OEM client. This program is scheduled for multiple shipset deliveries through 2020.

On July 14th, 2008, GTI received their Partnership for Safety Plan (PSP) from the Seattle Aircraft Certification Office (SACO) of the Federal Aviation Administration (FAA). The plan defines the working relationship between GTI and the FAA, improving the communication process and response time for obtaining Supplemental Type Certificates (STC).
