Greenpoint Aerospace Acquires Jet Works Air Center

Kirkland, WA – October 4, 2013 – [Greenpoint Aerospace, Inc.](#), a division of [Greenpoint Technologies](#), acquires Jet Works Air Center (JWAC), a corporate and VIP MRO Company in Denton, TX.

Greenpoint Aerospace purchases JWAC’s assets and plans to perform interior refurbishments, VIP completions, maintenance, aircraft painting, and avionics repair and installation. The facility has over 100,000 square feet of hangar and office space at the Denton Municipal Airport and employs 80 technicians and support staff. The location is within minutes of sister company, Odyssey Aerospace Components, which specializes in design engineering, manufacturing, and quality fit and finish of VIP cabinetry for business jets worldwide.

“The Denton facility is a wonderful addition to the Greenpoint family. Having access to Greenpoint Technologies’ and Odyssey Aerospace’s design, engineering and technical teams allows us to better serve our refurbishment and completion customers. The combined capability provides the level of excellence in modifications and maintenance our customers expect,” states Greenpoint Aerospace President Trey Bryson.

“The experience and value Greenpoint offers the industry are extensive. The company has a well-established culture providing creative solutions for manufacturing, modifications and completions. This is another option for our new and existing customers,” advises Greenpoint Technologies President and CEO Scott Goodey.

Greenpoint Aerospace Hangar Facilities in Denton, TX
