Greenpoint Technologies Completing Crystal AirCruises™ 777 VIP Interior

Kirkland, Wash. – 05 October 2016 – [Greenpoint Technologies](http://www.greenpointtechnologies.com), a Zodiac Aerospace Company, announces the design and completion of Crystal AirCruises™ new luxury Boeing 777-200LR.

Greenpoint's Design Team collaborated with Crystal AirCruises™ early in the completion process, designing a luxury interior in line with the company's brand and existing ships. The interior includes a grand Lounge with a stand-up bar, sofas and tables for guests to dine, relax and socialize. The aircraft also features custom Crystal AirCruises Executive Class™ seats, which fully recline to lie-flat beds, custom blankets and pillows, flat screen TVs, Wi-Fi connectivity and in-flight entertainment. While the Boeing 777-200LR airframe is built to accommodate 380 passengers, this interior was designed to ensure maximum personal space and comfort for only 84 guests.

“From the beginning, Crystal AirCruises™ embedded the vision of providing the ultimate experience and luxury of travel for its guests. We teamed closely with Crystal AirCruises's Design Team to understand their ship designs and brand value, and while pulling similarities we embraced the company's unique experience in flight. I believe guests will enter and feel excitement, refinement and ultimate care,” explains Annika Wicklund, Greenpoint Design Director.

The aircraft is currently undergoing completion at Greenpoint's facility in Moses Lake, Washington, and is on schedule to deliver next year. Once complete, the aircraft will begin transporting guests in VIP accommodations on 14, 21 and 28-day itineraries to the world's most exotic locations.
