Greenpoint Technologies Exhibits at EBACE

Kirkland, Wash. – 9 May 2014 – [Greenpoint Technologies](#), a premier VIP completions center for [Boeing Business Jets \(BBJ\)](#), exhibits at booth #3034, showcasing its expanded business jet offerings at the European Business Aviation Convention and Exhibit (EBACE), the 20th to 22nd of May, in Geneva, Switzerland.

Greenpoint Technologies exhibits with sister companies Greenpoint Aerospace, a business jet refurbishment and maintenance, repair and overhaul (MRO) service center, and Odyssey Aerospace Components, a VIP business jet cabinetry manufacturer and precision machining facility. The company expands to an all-inclusive suite of services for widebody aircraft to smaller business jets, from “green” completions to refurbishments and all maintenance stages throughout the aircraft life. Greenpoint offers every size business jet owner and operator the services necessary to maintain the safety and innovation of their aircraft.

The company’s Moses Lake widebody facility, Wash., is in renovation preparing for two 787 completions. Design Director Annika Wicklund describes Greenpoint’s approach to the VIP 787. “Our designs are moving toward efficiency, both in energy and technology as well as space and comfort. The main goal is to encompass all aspects of a client’s life effectively into their business jet. We assimilate the highest level of performance, decorum and the luxuries of both home and office all at your fingertips.” A preview of the company’s 787 Azure interior will debut at the show.

Greenpoint’s first, fully completed 747-8 WVIP aircraft delivers this year. As one of the last VIP 747-8s to deliver from Boeing in 2013, it will be the first to redeliver in the industry. An accomplishment both the company and client will celebrate.

747-8 WVIP Interior by Greenpoint Design Studio (Master Suite and Upper Deck Lounge)

Greenpoint Technologies is a premier BBJ Completion Center, creating superior aircraft products and VIP completions exclusively for Boeing aircraft. Greenpoint provides turnkey VIP completions with an exemplary 99 percent on-time delivery rate in over 25 years of private ownership. The Greenpoint company umbrella encompasses all disciplines in-house from engineering and design to manufacturing and installation of VIP interiors; enabling manufacture of interiors structure, VIP cabinetry, custom machined parts and aircraft heavy maintenance. The company embodies a continuous improvement culture reflected in its lean operations, positive customer surveys and extremely low attrition rate. Strategic goals focus on the customer experience by incorporating quality, commitment and craftsmanship into every program. To learn more about Greenpoint Technologies, visit www.greenpnt.com.
