Greenpoint Products and Services Delivers Commercial Interiors

Marysville, WA – 19 February 2014 – [Greenpoint Products and Services](http://www.greenpointps.com) (GPS), a leading manufacturer of aircraft interiors and components, completes first article inspections and begins Boeing 777-200 commercial interior deliveries.

The Greenpoint Technologies contracted build-to-print and testing program includes manufacturing Boeing 777-200 interior bar units, coat closets and video control cabinets (VCC). The testing and first article inspections completed on plan which allows deliveries to begin next month with conclusion by July of 2014.

“The Greenpoint Products and Services team continues to impress clients by their dedication to manufacturing excellence and on-time delivery. The quality standards and work ethic of the team exceeded our client’s expectations. The inspection revealed only minor pickups, positive results for the company’s first airline contract,” declares Greenpoint Vice President of Operations Adrian Osborn.

777-200 Bar Units with Multi-Light Features

Greenpoint Products and Services (GPS), a division of [Greenpoint Technologies](http://www.greenpointtechnologies.com), is a leading manufacturer of aircraft interiors in Marysville, Washington located 20 miles north of Boeing’s widebody factory. GPS supports both commercial and VIP interiors, specializing in build-to-print and custom products. Services include general manufacturing, mockup and prototype fabrication, static and decompression testing, and Parts Manufacturer Approval (PMA) authority.
